775. ENERGY EFFICIENCY CODE FOR NEW FEDERAL RESIDENTIAL LOW-RISE BUILDINGS

Priority: Other Significant

Legal Authority: 42 USC 6834

CFR Citation: 10 CFR 435

Legal Deadline: Final, Statutory, October 24, 1994.

Abstract: Title III of the Energy Conservation and Production Act as amended by the Energy Policy Act of 1992 directs DOE to establish Federal building energy standards that require in new Federal buildings those energy efficiency measures that are technologically feasible and economically justified. The standards for Federal buildings are intended to parallel closely the voluntary building energy codes of the Energy Policy Act for private sector construction. Interim energy performance standards which DOE had issued before enactment of the Energy Policy Act are to remain in effect for the Federal sector until the new Federal building energy standards become effective.

Legal Authority: 42 USC 13235

CFR Citation: 10 CFR 409

Legal Deadline: Final, Statutory, April 24, 1993.

Abstract: The Energy Policy Act of 1992 requires DOE to issue regulations establishing the State and Local Incentives Program. Under this program DOE may grant financial assistance to States for projects in DOE-approved State plans to promote use of alternative fuels and alternative-fueled vehicles. With the publication of an integrated State Energy Program (61 FR 35890), the alternative fuel grant programs may be a part of the State grant special projects, depending on funding availability. The next action will be a cancellation notice of any separate State grant program.

Legal Authority: 42 USC 6295

CFR Citation: 10 CFR 430

Legal Deadline: Final, Statutory, January 1, 1994.

Abstract: The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy efficiency standard levels for most types of major residential appliances and generally requires DOE to undertake two subsequent rulemakings, at specified times, to determine whether the extant standard for a covered product should be amended.

This is the initial review of the statutory standards for residential furnaces and boilers.

Abstract: The efficiency requirements in the statute correspond to the levels in ASHRAE/IESNA Standard 90.1 as in effect on October 24, 1992. The statute further provides that if the efficiency levels in ASHRAE/IESNA Standard 90.1 are amended after that date for any of the covered products, as recently occurred, the Secretary of Energy must establish an amended uniform national standard for such equipment at the new minimum level for each effective date specified in ASHRAE/IESNA 90.1, unless he determines that a more stringent standard is technologically feasible and economically justified and would result in significant additional energy conservation. Additionally, the Secretary may not prescribe any amended standard that increases the maximum allowable energy use or decreases the minimum required energy efficiency of a covered product.

800. RADIATION PROTECTION OF
THE PUBLIC AND THE ENVIRONMENT

Priority: Other Significant
Legal Authority: 42 USC 2201; 42 USC 7191
CFR Citation: 10 CFR 834
Legal Deadline: None

Abstract: This action would add a new 10 CFR 834 to DOE’s regulations establishing a body of rules setting forth the basic requirements for ensuring radiation protection of the public and environment in connection with DOE nuclear activities. These requirements stem from the Department’s ongoing effort to strengthen the protection of health, safety, and the environment from the nuclear and chemical hazards posed by these DOE activities. Major elements of the proposal include a dose limitation system for protection of the public; requirements for liquid discharges; reporting and monitoring requirements; and residual radioactive material requirements.

Additional Information: The Environmental Protection Agency (EPA) is considering revising the Federal Guidance for Radiation Protection of the Public. This Presidential-level guidance would refine the radiation protection and dose limitation framework for the public, and may include numerical Radiation Protection Goals (i.e., dose limits). Because it is DOE’s policy to be consistent with Federal radiation protection policy, the Department is adjusting the schedule for part 834 in anticipation of revised Federal Guidance and will issue the rule following EPA action on the

guidance. This will allow DOE to be consistent with the most current Presidential-level guidance upon its release.
